

VixWin Platinum combines cutting-edge tools and powerful features that yield crisp, clearly detailed images. With over 70 improvements and time-saving tools, every practice will benefit from the latest innovations in imaging.

See how VixWin Platinum can accelerate the digital radiology workflow in any practice!

Intuitive User Interface

- New icon graphics in a more intuitive and user-friendly software environment
- Fully customizable interface – set background color, icon size and toolbar functions

Enhanced Image Quality

- New Optimizer tool to improve clarity and definition of images
- New Spine Compensation tool for Orthoralix DDE pans

Accelerated Workflow

- Auto-advance and auto-rotation for capturing series
- Convenient Quick Mount Selector for the most frequently used templates
- Keyboard shortcuts for faster image import/export

Plus...

- New security options to control access to application
- More than 70 general improvements

VIXWIN™

PLATINUM

Imaging Software

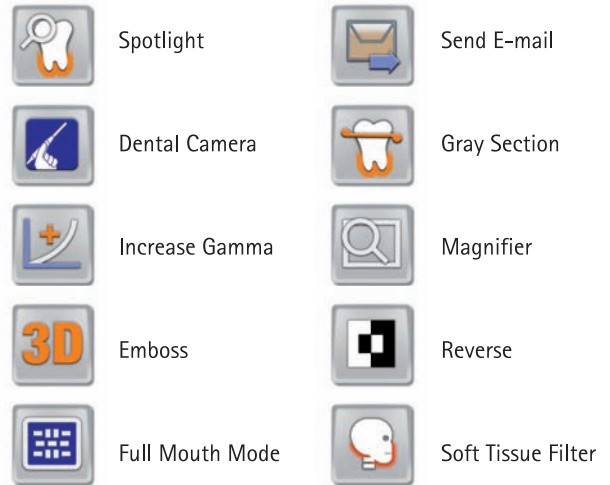

The most advanced release in the powerful
Gendex Imaging Software series!

VixWin™ Platinum Advantages

Intuitive User Interface

All new user interface provides a better user experience and significantly minimizes the learning curve for new users adopting digital radiography.

New graphical icons to perform tasks

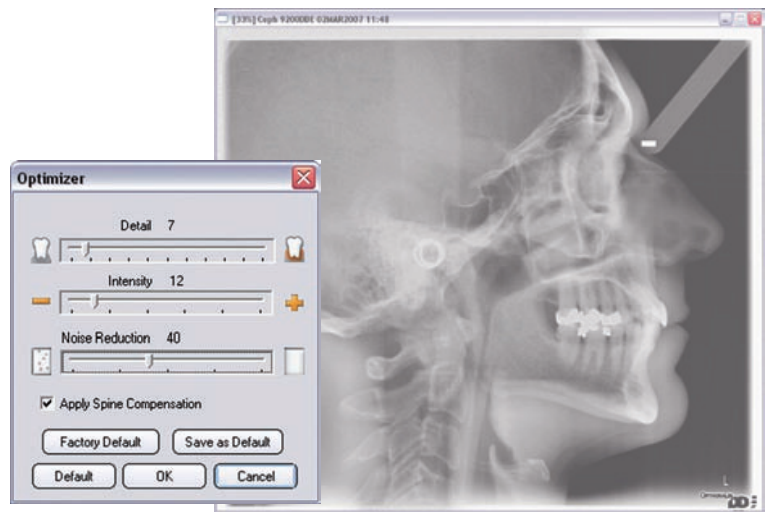

Enhanced Image Quality

VixWin Platinum takes imaging to the next level. The new Optimizer and Spine Compensation tools help to clarify definition in images to enhance diagnostic capabilities.

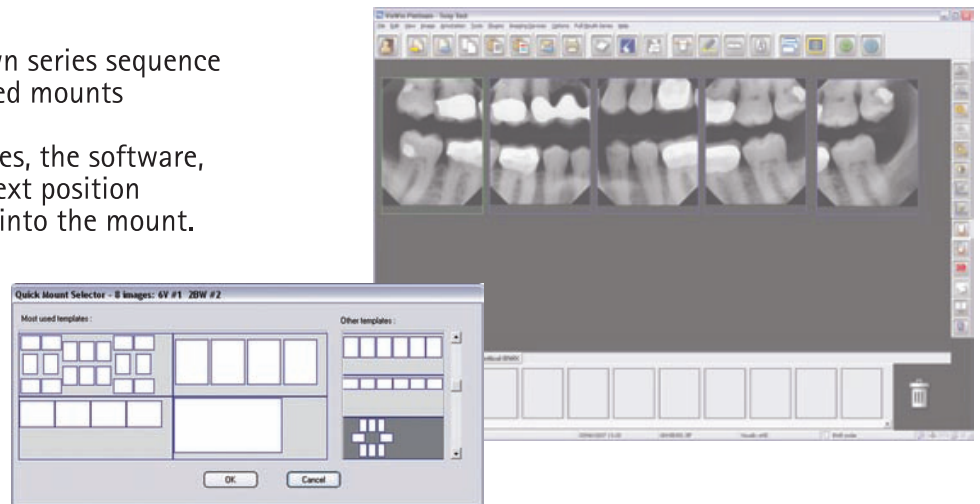

All new Optimizer tool to improve clarity and definition

Accelerated Workflow

Team members can set their own series sequence and easily access their most used mounts with Quick Mount Selector. When taking images in any series, the software, not the user, advances to the next position and orients the image properly into the mount.

Quick mount selector for the four most used templates
